

Jordan Health and Wellness empowers individuals to build, heal, and enhance their social and emotional wellness through the following strategies:

Empower individuals to enhance social and emotional wellness for their students, themselves, and others

- Provide training, tools, and education to facilitate student's **social and emotional growth** including evidence-based curriculum, wellness centers, and training for school staff
- Provide tools and supports that enhance **educator and employee wellness**
- Spread wellness knowledge, tools, and resources to parents, families, and community members

Amplify District suicide, bullying, and violence prevention efforts

- Support **SafeUT** implementation and support effective school-based intervention
- Support **content monitoring** software and effective school-based intervention
- Collaborate with essential community partners in prevention (e.g. AFSP)
- Support evidence-based prevention strategy implementation (e.g. C-STAG)
- Provide **training and support for school-based prevention** plan and program implementation

Increase student and family access to quality, clinical mental health services

- Provide responsive mental health services through school-based **Clinical Support Specialists**
- Facilitate access to community-based, clinical mental health services through the **Mental Health Access Program** and maintain other essential community partnerships
- Improve access to mental health services through regular, accessible **mental health screenings**

Provide responsive crisis management and support to schools

- Support school **crisis response and grief support** in incidents of student/staff death
- Facilitate healing and recovery following critical incidents
- Provide training and support for District crisis intervention teams as well as school teams
